

A fixed dose combination of Rabeprazole and Domperidone significantly improved reflux symptoms in patients with Laryngopharyngeal Reflux Disease (LPR).

Semmanaselvan K, et al. *J Assoc Physicians India*. 2015; 63(7):27-32.

- Efficacy, safety and tolerability of a fixed dose combination of Rabeprazole (enteric-coated, EC) 20 mg + Domperidone (sustained release, SR) 30 mg capsule was evaluated for treatment of laryngopharyngeal reflux (LPR) in 50 patients (>18 years of age).
- Twelve weeks of treatment significantly improved reflux symptoms. The combination was found to be safe and well tolerated.

Rabeprazole (enteric-coated, EC) 20 mg + Domperidone (sustained release, SR) 30 mg capsule offers therapeutic benefit in LPR
